

Construction Notice

October 5, 2026

Dear Resident:

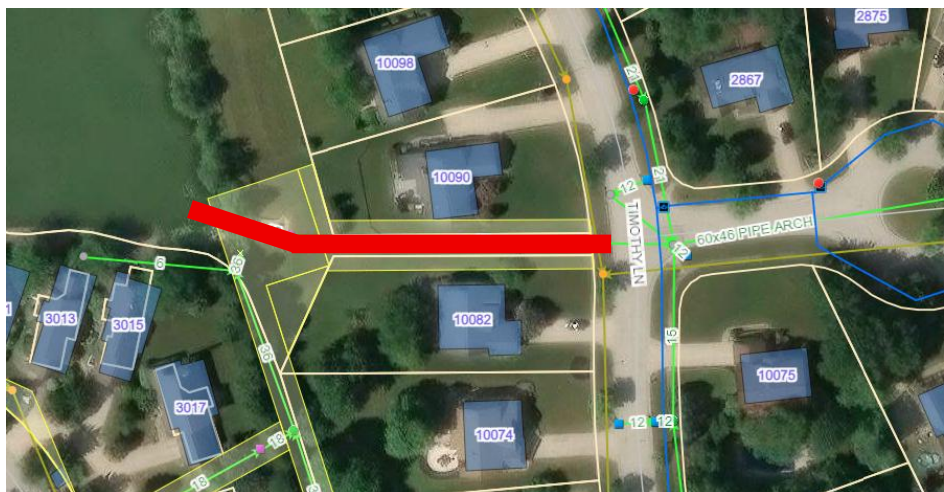

The City of Twinsburg will be modifying drainage structures and dredging Waterford Pond at Glen Eagles Golf Course west of Timothy Ln. The work will include dewatering the pond, modifying the structures in the pump intake house, modifying the pond outlet structure, and removing accumulated sediment in multiple areas of the pond. This will help to restore the pond to its originally intended depth and volume, improve water quality, and reduce the risk of flooding. In order to complete this work, we have hired AMS Landscaping, LLC. They will be accessing the pond through a utility easement that runs between 10090 Timothy Ln and 10082 Timothy Ln, as shown below. Any damage done to the yards within the easement will be repaired by the contractor, with final seeding done in the spring when grass is more likely to grow.

Construction equipment and vehicles will often be blocking a lane of traffic and the sidewalk on Timothy Ln near the easement. Please drive safely and obey all construction signs and flaggers.

Construction is expected to begin the week of November 2nd and will be completed in March 2027. This work is sensitive to rain, snow, and temperature, so wet or cold weather may delay this work past the expected completion date.

The City will provide Construction Inspection from the Engineering Department, and we can be reached at: (330)-963-6233. For after-hour concerns the non-emergency police dispatch number is 330-425-1234, and they can contact the contractor or other City personnel as needed.

Respectfully,
Patrick Jeffers, P.E.
Municipal Engineer
